(1) A non-GAAP measure. See accompanying schedule that reconciles GAAP to non-GAAP measures along with a statement indicating why the Company believes the non-GAAP measure provides useful information for investors.

Dallas, TX – August 7, 2018– Primoris Services Corporation (NASDAQ GS: PRIM) (“Primoris” or “Company”) today announced financial results for its second quarter ended June 30, 2018.

The Company also announced that on August 2, 2018 its Board of Directors declared a \$0.06 per share cash dividend to stockholders of record on September 28, 2018, payable on or about October 15, 2018.

David King, President and Chief Executive Officer of Primoris, commented, “In the second quarter, Primoris completed the acquisition of Willbros. We are pleased that during our one month of ownership, Willbros contributed positively to our revenues and earnings, excluding one-time expenses associated with the acquisition. We expect that the acquisition will be accretive to our earnings during the second half of this year.

“With the delay in the start date for our large East Coast pipeline project to the end of the second quarter, our pipeline results were less than we had hoped, but we have started work on the project and are looking to much better results from the segment in the second half of the year. The second quarter also included strong performance from our power jobs and continued positive results in our natural gas utility work.”

Mr. King concluded, “As we look to the remainder of this year and in to 2019, we continue to see an extremely positive pipeline market, not just for large diameter work but also for smaller diameter projects in the Permian Basin where we have an established presence. Our gas utility work and the addition of the electric T&D segment should allow us to grow our MSA revenue, providing a stable revenue base as we pursue LNG and petrochemical opportunities on the Gulf Coast. We have maintained a strong balance sheet and have over \$2.8 billion in backlog. We expect excellent financial performance not only for the next two quarters, but also for 2019.”

2018 SECOND QUARTER RESULTS OVERVIEW

Revenue was \$648.8 million for the three months ended June 30, 2018, an increase of \$17.6 million, or 2.8%, compared to the same period in 2017. The increase was primarily due to incremental revenue in the three months ended June 30, 2018 from acquisitions (\$79.5 million combined), initial progress on a major pipeline project on the Atlantic coast, higher Louisiana DOT volumes, and a West Texas solar electric facility project. The overall increase was partially offset by the substantial completion of two large Florida pipeline projects and a petrochemical plant project in 2017. Gross profit was \$71.4 million for the three months ended June 30, 2018, a decrease of \$13.1 million, or 15.5%, compared to the same period in 2017. The decrease was primarily due to the substantial completion in 2017 of two large Florida pipeline projects and a petrochemical plant project, partially offset by an increase in expected claim recovery on the Belton, Texas area Civil projects. Incremental gross profit in the three months ended June 30, 2018 from acquisitions totaled \$11.6 million. Gross profit as a percentage of revenue decreased to 11.0% in the three months ended June 30, 2018 from 13.4% in the same period in 2017 due primarily to favorable performance on the two Florida pipeline projects in 2017.

SEGMENT RESULTS

- **Power, Industrial, and Engineering (“Power”)** - The Power segment operates throughout the United States and specializes in a range of services that include full EPC project delivery, turnkey construction, retrofits, upgrades, repairs, outages, and maintenance for entities in the petroleum, petrochemical, water, and other industries. This segment includes the operations of Willbros Canada segment.
 - **Pipeline and Underground (“Pipeline”)** – The Pipeline segment operates throughout the United States and specializes in a range of services, including pipeline construction, pipeline maintenance, pipeline facility work, compressor stations, pump stations, metering facilities, and other pipeline related services for entities in the petroleum and petrochemical industries. This segment includes the operations of Willbros oil and gas segment.
 - **Utilities and Distribution (“Utilities”)** – The Utilities segment operates primarily in California, the Midwest, and the Southeast regions of the United States and specializes in a range of services, including utility line installation and maintenance, gas and electric distribution, streetlight construction, substation work, and fiber optic cable installation.
 - **Transmission and Distribution (“Transmission”)** – The newly formed Transmission segment operates primarily in the Southeastern and Gulf Coast regions of the United States and specializes in a range of services in electric and gas transmission and distribution, including comprehensive engineering, procurement, maintenance and construction, repair, and restoration of utility infrastructure. This segment represents the operations of Willbros T&D segment.
 - **Civil** – The Civil segment operates primarily in the Southeastern and Gulf Coast regions of the United States and specializes in highway and bridge construction, airport runway and taxiway construction, demolition, heavy earthwork, soil stabilization, mass excavation, and drainage projects.

Power, Industrial, & Engineering Segment: Revenue increased by \$9.2 million, or 5.8%, for the three months ended June 30, 2018, compared to the same period in 2017. The growth is primarily due to a West Texas solar electric facility project that started in 2018, a refinery project in Southern California, and a monoethylene glycol plant project in Texas. In addition, a LNG plant engineering and construction project in the Northeast, and the acquisition of Willbros increased revenue for the second quarter of 2018. The overall increase was partially offset by the substantial completion of a large petrochemical plant in Louisiana and our Wilmington joint venture power plant project in 2017. Gross profit for the three months ended June 30, 2018, increased by \$2.4 million, or 13.2% compared to the same period in 2017. The increase is primarily due to the revenue growth and slightly higher margins. Gross profit as a percentage of revenue increased to 12.3% during the three months ended June 30, 2018, compared to 11.5% in the same period in 2017 primarily due to a strong performance and favorable margins realized by our Carlsbad joint venture project.

Pipeline & Underground Segment: Revenue decreased by \$44.0 million, or 32.7%, for the three months ended June 30, 2018, compared to the same period in 2017. The decrease is primarily due to the completion of two large pipeline jobs in Florida and a pipeline job in West Texas in 2017, partially offset by the initial work on a major pipeline project on the Atlantic Coast and incremental revenue from the Willbros and Coastal acquisitions. Gross profit for the three months ended June 30, 2018 decreased by \$28.7 million, or 72.9%, compared to the same period in 2017. The decrease is primarily attributable to the higher revenue and gross profit from the two pipeline jobs in Florida in 2017. Gross profit as a percent of revenue decreased to 11.8% during the three months ended June 30, 2018, compared to 29.2% in the same period in 2017. The decrease is primarily due to our strong performance on the two Florida jobs in 2017, which benefited from good weather conditions and no weather delays and high productivity. The higher gross margins experienced in 2017 is not common and not expected to occur again in the future.

Utilities & Distribution Segment: Revenue increased by \$15.9 million, or 7.5%, for the three months ended June 30, 2018, compared to the same period in 2017. The increase is primarily attributable to higher revenue with a major utility customer in the Midwest and the impact of the acquired FGC operations late in the second quarter of 2017. The overall increase was partially offset by lower revenue from a collaboration Master Service Agreement (“MSA”) for a major utility customer in California. Gross profit for the three months ended June 30, 2018 increased by \$2.2 million, or 6.9%, compared to the same period in 2017. The increase is primarily due to the impact of higher revenue. Gross profit as a percentage of revenue decreased slightly to 15.1% during the three months ended June 30, 2018, compared to 15.2% in the same period in 2017.

Transmission & Distribution Segment: The Transmission segment was created in connection with the acquisition of Willbros. Revenue and gross profit represent results from the June 1, 2018 acquisition date to June 30, 2018.

Civil Segment: Revenue decreased by \$6.0 million, or 4.7%, for the three months ended June 30, 2018, compared to the same period in 2017. The decrease is primarily due to the substantial completion of a methanol plant project and a large petrochemical plant project as well as lower Texas DOT volumes. The overall decrease was partially offset by higher Louisiana DOT volumes. Gross profit increased by \$5.3 million for the three months ended June 30, 2018, compared to the same period in 2017 primarily due to higher profit on Louisiana DOT projects and increases in expected claim recovery on the Belton area projects. The overall increase was partially offset by higher costs on an airport project in the second quarter of 2018. Gross profit as a percent of revenue increased to (0.1%) during the three months ended June 30, 2018, compared to (4.3%) in the same period in 2017 primarily due to the reasons noted above.

OTHER INCOME STATEMENT INFORMATION

Selling, general and administrative (“SG&A”) expenses were \$43.5 million during the three months ended June 30, 2018, a decrease of \$1.4 million, or 3.1%, compared to the second quarter of 2017. The primary reason for the decrease was a reduction in compensation related expenses, including incentive compensation accruals and a decrease in legal fees. The overall decrease is partially offset by incremental expense from businesses acquired. SG&A expense as a percentage of revenue decreased to 6.7% compared to 7.1% for the corresponding period in 2017 due to lower expenses and increased revenue.

Merger and related costs were \$7.7 million for the three months ended June 30, 2018, compared to \$1.1 million in the same period in 2017. The increase is primarily related to higher costs associated with the acquisition of Willbros. Such costs primarily consisted of severance and retention bonus costs for certain employees of Willbros and professional fees paid to advisors.

The effective tax rate on income attributable to Primoris (excluding noncontrolling interests) was 24.0% for the six months ended June 30, 2018. The rate differs from the U.S. federal statutory rate of 21% primarily due to state income taxes, investment tax credits, and nondeductible components of per diem expenses.

OUTLOOK

Based on anticipated levels of customer maintenance spending, MSA spending, new project awards, and an expected corporate tax rate of 24.0%, the Company re-affirms our estimate that for the fiscal year ending December 31, 2018, net income attributable to Primoris will be between \$1.50 and \$1.70 per fully diluted share. This estimate anticipates receiving timely notices to proceed for a major pipeline project in backlog which would allow for a significant increase in revenues and profitability in the second half of 2018.

BACKLOG

Segment	Backlog at June 30, 2018 (in millions)			Expected Next Four Quarters Total Backlog Revenue Recognition
	Fixed Backlog	MSA Backlog	Total Backlog	
Power	\$ 275	\$ 112	\$ 387	92%
Pipeline	863	48	911	85%
Utilities	31	652	683	100%

Civil	527	—	527	74%
Total	\$ 1,721	\$ 1,113	\$ 2,834	89%

At June 30, 2018, Fixed Backlog was \$1.7 billion, compared to \$1.8 billion at December 31, 2017.

At June 30, 2018, MSA Backlog was \$1.1 billion, compared to \$775 million at December 31, 2017. MSA Backlog represents estimated MSA revenues for the next four quarters.

At June 30, 2018, Total Backlog was \$2.8 billion, compared to \$2.6 billion at December 31, 2017.

Backlog, including estimated MSA revenues, should not be considered a comprehensive indicator of future revenues. There is a certain percentage of total revenues from projects such as cost reimbursable and time-and-materials projects that do not flow through backlog. Any project may still be cancelled at the convenience of our customers.

SUPPLEMENTAL NON-GAAP FINANCIAL MEASURE
(In Thousands, Except Per Share Amounts)
(Unaudited)

Reconciliation of net income attributable to Primoris (GAAP measure) to pro-forma adjusted net income attributable to Primoris (non-GAAP measure)

Pro-forma adjusted net income attributable to Primoris is a non-GAAP measure provided as a supplement to present an alternative net income measure which excludes the impact of Willbros' operations and merger and related costs. Management believes that pro-forma adjusted net income attributable to Primoris provides useful information to investors in assessing the comparability of the Company's ongoing operational results and trends. Pro-forma adjusted net income should not be considered in isolation, as a substitute for, or more meaningful than, net income or any other measure reported in accordance with GAAP, but rather to provide additional information useful in evaluating the Company's operational trends and performance.
